

SEMINOR RIGID/FLEXIBLE

MULTI-PURPOSE CANNULA FOR ASSISTED HUMAN REPRODUCTION

- A) The Seminor Rigid is a semi-rigid catheter for intrauterine and cervical insemination.
- B) The Seminor Flexible is a catheter for intrauterine and cervical insemination.

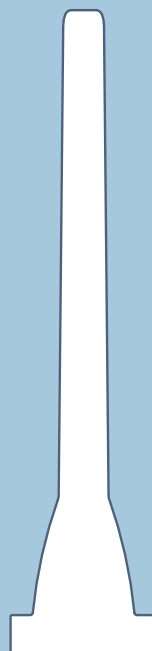

FEATURES

- the Seminor Rigid (A) can be shaped according to the degree of uterine flexion
- the Seminor Flexible (B) enables easy insertion with minimal patient discomfort
- the conical proximal end closes the cervix adequately for maximum sperm transfer
- as result of a direct connection between Seminor and syringe, the loss of spermatozoa during the transfer is minimized

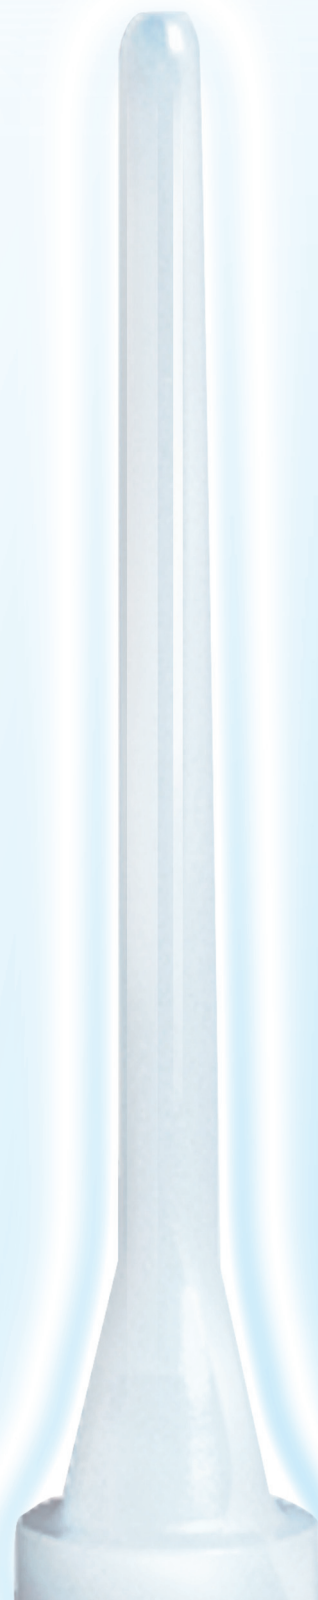

GYNO INFO SEMINOR RIGID/FLEXIBLE

Length	48 mm (\pm 0.5 mm)
Volume	min. 0.098 ml
Sterile	sterilized by radiation
Packaging	125/shipping box
Quality control	MEA and LAL
Order number	A) #4502 A ② B) #4502 B ②

GMP Belgium Seminor 04/2011
